Projects

Book Store Web Application

Technologies Used:

Description: Developed a full-featured e-commerce web application for a book store with functionalities for both users and administrators.

Key Features:

- **Shopping Cart:** Users can add and remove books, with automatic calculation of the total price.
- **Customer Support:** Integrated a contact form and live chat for customer inquiries and support.
- **Mobile Responsiveness:** Ensured the website is fully responsive, providing a seamless experience across all devices.
- **Admin Panel:** Built an admin dashboard to manage products, orders, and customer data, with features like product search by name.
- **Security & Privacy:** Implemented security best practices to safeguard customer data.
